

HAJI ABUBAKER SIDIQ M

FULL STACK SOFTWARE ENGINEER

Chennai - 600030 | +91 6379539528 | sidiqabubaker2002@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Dedicated and skilled Full Stack Software Engineer with over 1 year and 3 months of professional experience in designing and implementing scalable, high-performance systems and dynamic web applications. Proficient in backend technologies like Java, Python, Spring Boot, and Django, alongside modern frontend frameworks including React and Bootstrap. Adept at translating complex requirements into modern cloud-ready solutions, optimizing full-stack performance, and modeling robust data structures using PostgreSQL and MySQL.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS

Frameworks & Libraries: Spring Boot, Django, React, Bootstrap

Databases: PostgreSQL, MySQL

Version Control and Debugging Tools: Git source tree, VS code and Chrome dev tool

IDEs worked on: Visual Studio

WORK EXPERIENCE

Let Us Support Pvt. Ltd. (Palmdigitalz)

Software Engineer

June 2025 – Present

Chennai, Tamil Nadu, India

Projects

1. PALMALL Legacy Modernization Platform (June 2025 - Present)

Technology Stack: Java, Spring Boot, PostgreSQL, Python, JavaScript, HTML, CSS, React, Bootstrap.

Responsibilities:

- Engineered a scalable legacy modernization platform processing raw mainframe codebases into modern cloud-ready microservices, reducing manual system analysis time by 35%.
- Architected a high-performance core parsing backend using Java, Spring Boot, and PostgreSQL.
- Implemented a business logic extraction engine to automatically generate business rules, use case diagrams, and technical documentation, bridging the gap between legacy code and modern requirements.
- Developed a microservices generator that converted extracted business rules into deployable Java Spring Boot and Python REST APIs, achieving 98% logic validation accuracy.
- Designed responsive and interactive data visualization dashboards using React, JavaScript, HTML/CSS, and Bootstrap to monitor backend processing metrics and database states.

2. Full-Stack E-Commerce Application (Internal/Personal Initiative)

Technology Stack: Python, Django, JavaScript, React, HTML, CSS, Bootstrap, MySQL.

Responsibilities:

- Engineered a Django-based web application featuring secure user authentication, interactive product catalogs, and stateful cart management.
- Designed RESTful API endpoints for seamless frontend-backend communication and simulated real-time order tracking.
- Utilized a relational MySQL database for secure data modeling and optimized data retrieval, while constructing a responsive frontend with React and Bootstrap.

EDUCATION

Madras University – Chennai, Tamil Nadu, India

2026 – 2028

Master of Computer Applications (Part-Time / Distance Learning)

Sadakathullah Appa College – Tirunelveli, Tamil Nadu, India

2019 – 2022

B.Sc. in Computer Science – 70.69%

Besant Technologies – Chennai, Tamil Nadu, India

2025

Python Full Stack Developer Certification
